- (1) Agricultural land is valued based on the productivity value of the property and not estimated market valuation.
- (2) A bill passed by the Kansas Legislature in 1994 clarified this class of property to include all property owned and operated by not-for-profit organizations not subject to federal income taxation pursuant to paragraphs (2), (3), (4), (7), (8), or (10) of Subsection C of Section 501 of the federal internal revenue code. This bill specifically established that private, not-for-profit country clubs would be assessed at 12% for all land that does not accommodate buildings or improvements.
- (3) The 2006 Kansas Legislature exempted from all property or ad valorem property taxes levied under the laws of the State, all commercial, industrial, telecommunications, and railroad machinery and equipment acquired by qualified purchase or lease after June 30, 2006 or transported into the State after June 30, 2006 for the purpose of expanding an existing business or creation of a new business.

Equalization Ratios

Annually, the Property Valuation Division of the Kansas Department of Revenue conducts a study to compare the assessed valuation of real property to estimated market value based on property sale prices. The study derives an equalization ratio which, when divided into assessed valuation, provides a means to approximate actual market value. According to the 2012 Preliminary Kansas Appraisal/Sales Ratio Study the equalization ratio for real property in Barton County was 11.13% for residential property and 22.65% for commercial and industrial real property.
